

Alberta Albertella

Politecnico di Milano
alberta.albertella@polimi.it

Born in January, 1st, 1962, in Italy
Married, two daughters,
lives in Milano, Italy
Address: via Carlo Forlanini 1
Phone: +390223996282

Education

Ph.D. in Geodetic, Surveying and Photogrammetric Sciences at the Politecnico of Turin (Italy), 1993

Dissertation on “Analysis by Fourier series on the sphere”. Doctoral Scholarship by MURST (Ministry of University and Scientific and Technological Research).

Master Degree in Physics, University of Milan (Italy), 1990

Thesis on “Satellite Gradiometry”.

Academic positions

Technician Assistant at Politecnico di Milano (Italy) *1993-2000*
Dep. of Hydraulic and Environmental Engineering, Transport Infrastructures and Surveys

Technician Director at the same Department *2000*

Assistant Professor at the same Department *2000-2004*

Scientific Guest at Technische Universität Dresden (Germany) *2004*
Institut für Planetare Geodäsie

Scientific Partner at Technische Universität München (Germany) *2005-2012*
Institut für Astronomische und Physikalische Geodäsie

Assistant Professor at DICA Politecnico di Milano (Italy) *2013-2015*

Associate Professor at DICA Politecnico di Milano (Italy) *2015*

Referee

Reviewer of papers for: Journal of Geodesy, Applied and Computational Harmonic Analysis, Journal of Surveying Engineering, Journal of Geodetic Science, IGeS Bulletin.

Research activities

Satellite Geodesy

Gravity field determination from satellite gradiometry. Collaboration with the following satellite missions projects:

- ARISTOTELES, 1989-1990, European project of gradiometric mission;
- STEP, 1993-1995, European project of fundamental physics also for geodetic purpose;
- GEM, 1995-1996, European project of gradiometric mission;
- SAGE, 1998, Italian project of accelerometric mission;
- GOCE (Gravity field and steady-state Ocean Circulation Explorer), 2009, European project of gradiometric mission.

From 2005 to 2012 was research partner in German Project GEOTOP (Ocean circulation from geodetic observation), Priority Research Program SPP 1257 Mass Transport and Mass Distribution in the Earth System.

Data processing

Statistical and numerical data analysis with applications to physical geodesy (geoid estimation). Estimation theory, statistical inference, Bayesian methods.

GIS and Remote Sensing

Statistical and numerical data analysis with applications to remote sensing and image classification. Digital Mapping analysis. GIS applications for the validation of spatial datasets.

Teaching at Politecnico di Milano

Digital Mapping - GIS

Lectures. Bachelor in Environmental Engineering.

2001-2004

Monitoring and Surveying techniques

Lectures. Bachelor and Master Degree in Environmental Engineering.

since 2013

Fundamentals of Representation

Lectures. Bachelor in Architecture.

since 2014
