

STEFANO TURRI – curriculum vitae

Born in Milano in 1963, ST was graduated (with honors) in Chemistry at Università Statale di Milano in 1989 and got his specialization in Materials Science (with honors) at Politecnico di Milano in 1995.

After a more than 10-year career as industrial researcher in a company of Montedison group, ST joined Politecnico di Milano in 2002 as Assistant Professor. He became Associate Professor in 2007 and from 2011 ST is Full Professor of Materials Science and Technology (SSD ING-IND/22) at the Department of Chemistry, Materials and Chemical Engineering “Giulio Natta”.

His research interests involve many issues in the general area of structure-to-property relations in polymers and polymer composites, with particular emphasis to the development of polymeric materials from renewable sources, organic coatings, advanced processing technologies, polymerization methods.

ST is author or co-author of more than 160 scientific publications (h-index 27, 2927 citations, source: Scopus september 2019) and more than 20 patents already filed in Europe and/or USA.

ST is currently teacher of the following courses at the Materials Engineering and Nanotechnology and Chemical Engineering degree programs of Politecnico di Milano:

- Materiali Polimerici B
- Principles of Polymer Chemistry
- Polymer Technology and Sustainability

From January 2017, ST is Coordinator of the Study Program in Materials Engineering and Nanotechnology at Politecnico di Milano.
