

CV of GIAMBATTISTA DE GHETTO

Giambattista De Ghetto was born in Borca di Cadore - Italy in 1953 and graduated in chemical engineering at Padua University in 1977.

1978-1979	Officer in alpine troops ("Alpini")
1979-1992	He joined Agip Mineraria and then held various positions world-wide in well design, oil& gas production and reservoir management
1993-1996	Manager of production facilities R&D – Agip
1997-2002	Manager of Technology Planning - Eni
2003-2006	Managing Director of Eni Tunisia
2006-2008	Managing Director of Eni Algeria
2008-2011	SVP Research and Technology Development - Eni
2012-2013	SVP of Health, Safety and Environment - Eni
2014-2015	SVP of Energy efficiency - Eni
2015-2016	EVP of Development, Operation and Technology – Eni. Retired from Eni on July 2016.
2014	Professor at Polytechnic of Milan.

He has taught Petroleum Engineering at the Parma University and has been world-wide distinguished lecturer for the Society of Petroleum Engineers (SPE) as well as Director of SPE's South and East Europe.

He has been chairman or guest speaker at several international conferences of the upstream oil industry.

De Ghetto is the author of various patents and 40+ publications on reservoir, well design, production, facilities, offshore developments, HSE and technology deployment.

The complete list of patents and publications can be found in LinkedIn, here below the last works are reported.

Last 2 patents:

- Method for the simultaneous re-injection without compressors of low-pressure gas and water in partially exhausted reservoirs with generation of electric power from re-pressurized gas (2014).
- Apparatus and process for carriage and recovery of hydrocarbons from a subsea well or a subsea pipeline in blow out conditions (2012).

Last 3 articles

- Energy Efficiency Methodologies and Innovative Applications in the Upstream Sector.
Abu Dhabi International Petroleum Exhibition and Conference, Abu Dhabi, November 2015
- Deploying a solar hybrid technology in a remote oil&gas production site.
Grand Renewable Energy, International Conference and Exhibition, Tokyo, July 2014
- Evaluating reputational risk and implications of a major accident hazard in e&p activities: a qualitative methodology.
SPE International Conference on HSE, Long Beach, USA, March 2014
