Post Doc Researcher in Architecture and Urban Design

Assistant Professor, Department of Architecture and urban Studies (DASTU), Politecnico di Milano

www.berlingieriarchitetti.it

Along the several research experiences, the developed issues progressively focused on the critical reading of the territory, of its physical structures and the anthropic overwritings.

Particular attention, emerged in the doctoral and post-doctoral courses, has been addressed to the relationship between infrastructures and urban form, considered as a key element for the understanding of urban systems in the contemporary and their development.

From 2004 to 2012 has carried out teaching collaboration activities at the Faculty of Architecture in Reggio Calabria, within architectural composition studios and in the Final Thesis studio in Urban Design and Architecture coordinated by prof. Laura Thermes. During this period has been tutor of several student degree theses related to urban regeneration of marginalized territories in southern contexts. Has been tutor and visiting professor in seminars and workshops of architecture and urban design such as the International Workshop Athens ExtraMoenia Reading Workshop, TU Delft (2015-2016); LId'A_ Laboratorio Internazionale di Architettura, Uni RC (2014; 2011); WAVE_ Workshop Architettura Venezia, IUAV (2010); International PhD Summer school, POLIMI Bergamo (2008) among others.

The teaching activity focuses mainly on urban design issues, with particular attention to the specific relationships that the project weaves with the context. Attention to the context and complex design of knots for the mending of the city, for the redevelopment of marginal spaces with experiments of typological hybridization between architecture and transport infrastructures, especially in the tutoring experiences for degree theses.

Since 2009 has been the principal at BAS_Berlingieri Architetti Studio, with a constant attitude for experimentation and design research. Based in Cosenza, the studio works around architecture at different scales of intervention. Far from a priori ideologies and conceptualizations, the studio's approach looks at the project as a collective poetic value, pursued through the continuous search for a methodological rigor and a constructive truth that characterizes the formal and expressive aspects of the works.
